# BUSWAY MEASUREMENT

### Simplify your busway purchase and ensure trouble-free installation

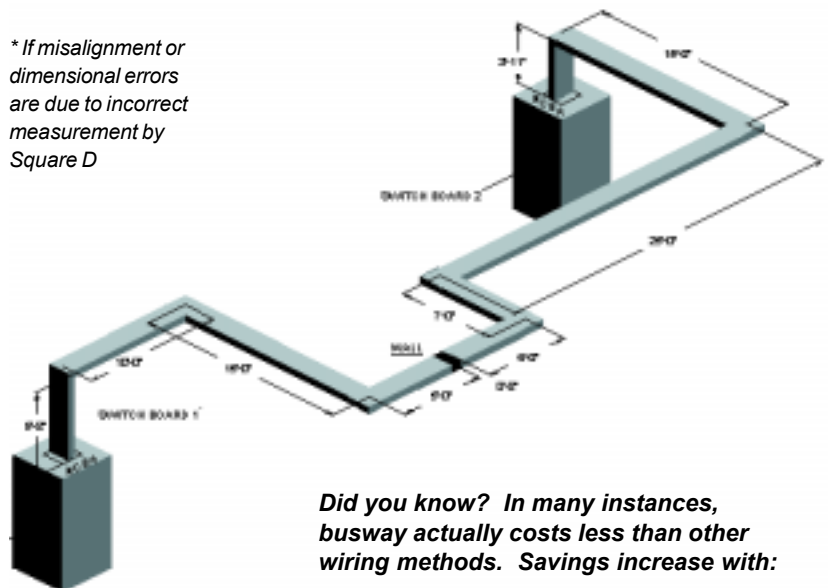

Busway measurement service is ideal for large and/or complex jobs where there is an increased potential for measurement errors. Costly mistakes can be avoided and/or corrected expediently.

Square D Services provides cost-effective busway field measurement services to ensure the proper length, orientation, and fit of your busway system. Using laser equipment and Brass™ software, our skilled technicians create approval-quality drawings and a bill of material for the run of busway. Advantages of using our busway measurement service include:

- **Full on-site measuring by skilled technician**
- **Guaranteed fit and alignment to equipment\***
- **Layout optimization**
- **Faster order processing**
- **Startup services available** (optional)

*\* If misalignment or dimensional errors are due to incorrect measurement by Square D*

***Did you know? In many instances, busway actually costs less than other wiring methods. Savings increase with:***

- Greater ampacity
- Longer circuits
- More complex circuits
- Consolidation of multiple smaller circuits
- Aluminum busway substituted for copper wiring
- Higher installer's labor rate

Square D Services offers solutions that will enhance performance, improve reliability, and extend the life of your electrical equipment. Simply put, we can provide your **Complete Service Solution**.
