## Square D<sup>®</sup> Brand Commercial Multi-Metering Sections with Integrated Front-Accessible Load-Side Wireway Make for Easy EUSERC Installations

**Palatine, Ill. (USA), October 2, 2008** — The new Square D<sup>®</sup> brand Commercial Multi-Metering tenant metering sections from Schneider Electric are compliant with Electric Utility Service Equipment Requirements Committee (EUSERC) standards and provide easy installation for electrical contractors. Standard integrated front-accessible load-side wireway means contractors can complete top-exit installations quickly and cost-effectively. Available in three or six-socket sections that can utilize either circuit breaker or fusible tenant main disconnects, Square D Commercial Multi-Metering sections from Schneider Electric feature a compact footprint for top-exit cables, providing increased design flexibility.

“Integrated front-accessible vertical load-side wireway makes it easier for electrical contractors to pull load-side cables when top exit is required,” said Mike Engel, Schneider Electric staff product specialist. “This innovation reduces installation time when a new tenant is added to a facility, which allows a contractor to more effectively manage his workforce.”

EUSERC develops and publishes uniform electrical service standards for member utilities in states located west of the Rocky Mountains, including Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, New Mexico, Oregon, Utah and Washington. EUSERC standards allow electrical equipment manufacturers like Schneider Electric to develop standard designs, such as the new Square D Commercial Multi-Metering sections.

## Square D Brand Commercial Multi-Metering Sections for EUSERC Applications

### Page 2 of 2

Square D Commercial Multi-Metering sections for EUSERC applications are available in Type 1 (indoor) and Type 3R (outdoor) enclosures, giving an engineer the freedom to adjust to a facility's interior and exterior design layouts. Sections with system ampacity ranging from 400A to 2,500A have a 24-inch depth; sections with 3,000A and 4,000A system ampacity are respectively 36 and 48 inches deep.

For more information about the Square D Brand Commercial Multi-Metering sections for EUSERC applications, call 888-SQUARED or visit [www.us.squared.com](http://www.us.squared.com).
