**SCHNEIDER ELECTRIC'S NAUTILUS™ TYPE XMLG PRESSURE TRANSMITTER PROVIDES
RELIABLE, ROBUST AND ACCURATE PERFORMANCE**

PALATINE, III. — May 14, 2008 — Schneider Electric has unveiled the most versatile solution for fluid control applications, the Telemecanique® brand Nautilus™ type XMLG pressure transmitter. Reliable, durable and easy to use, the Nautilus Type XMLG pressure transmitter is a necessary part of any pumping system as it converts applied pressure to an electrical signal that can be used to control and/or monitor a process variable. With pressure ranges from -14.5 to 8700 psi, and analog current output as 4-20 mA or a voltage output from 0-10 V, the Nautilus type XMLG pressure transmitters can be used anywhere exact pressure measurement is required.

“Schneider Electric has developed a product that answers pump control manufacturers’ and pump OEMs’ call for a more reliable, cost-effective and compact pressure transmitter that easily interfaces with common automation systems, whether they are PLC- or variable frequency drive-based,” said Mark Duncan, product marketing manager, limit switches and fluid control, Schneider Electric. “The Nautilus type XMLG pressure transmitters allow considerable installation freedom and offer excellent industrial qualities, making them particularly suitable for demanding applications.”

The ceramic sensor technology used in the Nautilus type XMLG pressure transmitters meets users’ most stringent requirements for high impact mechanical performances. The product’s rugged, robust construction provides years of uninterrupted service and long-term stability. In addition, the Nautilus type XMLG pressure transmitter is designed with excellent immunity to electromagnetic interference and offers verified environmental protection with IP66 and IP67 ratings. Short-circuit and reverse polarity protection are standard features and the product will not leak in the event the destruction pressure is exceeded.

NEW XMLG PRESSURE TRANSMITTER FROM SCHNEIDER ELECTRIC

Page 2 of 2

Users also will benefit from the Nautilus type XMLG pressure transmitter's compact construction which simplifies installation in the machine and reduces panel size. An integrated quick connection system, Quickon from Phoenix Contact, or M12 connector, allow fast cabling that saves users time and the hassle of special tools. The economical product also is available in bulk for even further cost savings.

The Nautilus type XMLG pressure transmitter is suitable for OEMs, control panel builders and system integrators in a number of industries, including transportation wash, industrial machines, specialty machines, packaging, material handling, water/wastewater, food and beverage, automotive and railways. Primary applications of the product include pneumatic and hydraulic installations, injection presses, industrial compressors, machine tools, pumps, water treatment, automobile construction, irrigation, compressors and vacuum systems.

For more information on the Nautilus type XMLG pressure transmitter or other Telemecanique automation and control products from Schneider Electric, call 1-800-392-8781 or visit www.us.telemecanique.com or <http://w3.squared.com/pump>.

About Schneider Electric

Schneider Electric total sales in North America in 2007 were \$6.6 billion (U.S.). These include the sales of the North American Operating Division of Schneider Electric (NAOD), as well as North American sales of other Schneider Electric companies such as APC, TAC, etc. Headquartered in Palatine, Ill., the North American Operating Division markets many of the brands of Schneider Electric to customers in the United States, Canada and Mexico. In the United States, Schneider Electric is best known by its flagship Square D® brand. Schneider Electric, the global specialist in energy management, offers integrated solutions making energy safer, more reliable, efficient and productive in the energy & infrastructure, industry, data centers & networks, buildings and residential markets. With sales of \$23.7 billion in 2007, the company's 120,000 employees in 102 countries help individuals & organizations make the most of their energy. Visit Schneider Electric on the Internet at:
